Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 & 11 are rejected under 35 U.S.C. 102(b) as being anticipated by McFarland (US Patent No. 6,606,860). McFarland discloses a energy conversion system with an enhanced heat engine and comprises: a heat exchanger (120) friction device and utilizing water or another absorbing medium, an expander (136), a pump (124), an electronic controller for controlling an input fan with a shaft and motor. The features of the vapor compression system, is not positively claim, therefore no patentable weight is given.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over McFarland in view of Fabris (US Patent No. 5,216,899). McFarland discloses the claimed invention above but lack a heat pump apparatus. Fabris teaches an expander for controlling expansion within a heat pump system. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the

disclosed invention of McFarland for utilizing with a heat pump apparatus as taught by Fabris for a more simpler and more efficient system operation.

Allowable Subject Matter

Claims 7-10 & 17-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
